

Missing Comdlg32.ocx error while running an application?

Outdated or missing comdlg32.ocx runtime library is causing this error. Here is a copy of [comdlg32.ocx](#) (~60 Kb Zip). Download the file to the Desktop and extract the comdlg32.ocx to your the **Windows\System32** folder.

Note: If you already have a copy of comdlg32.ocx, backup the existing file to a different folder and delete it from System32 folder.

1. Download [comdlg32.zip](#) and save to Desktop.
2. Unzip the file using WinZip or any other utility.
3. Extract comdlg32.ocx to Windows\System32 folder.
4. Type the following command from Start, Run dialog:

```
regsvr32 %Systemroot%\System32\comdlg32.ocx
```

Note: If you're using Windows Vista, you'll need to run the above command from an [elevated Command Prompt](#). To open an elevated Command Prompt, click Start, click All Programs, click Accessories, right-click Command Prompt, and then click **Run as administrator**.

You should see the following message:

```
DllRegisterServer in C:\WINDOWS\System32\comdlg32.ocx succeeded.
```

Comdlg32.ocx file information
